COVID-19 VACCINE PHASES

ALABAMA'S PHASE 1 VACCINATION SCHEDULE

PHASE 1A

Healthcare Workforce and Long-term Care

Emergency medical service personnel, Nurses, Nursing Assistants, Home Healthcare Personnel, Physicians, Technicians, Therapists, Phlebotomists, Pharmacists, Students/Trainees, Contractual Healthcare Staff, Medical Supply Delivery, Mortuary Services, and other persons who could be exposed to infectious agents through work

PHASE 1B

Essential workers at highest risk for work related exposure and persons in identified age groups at risk for COVID-19 associated morbidity and mortality

Persons age 75 years and older; Frontline essential workers; Persons working or living in congregate settings including but not limited to homeless shelters and group homes; First responders including firefighters and law enforcement.

PHASE 1C

Persons in identified age groups at risk for COVID-19 associated morbidity and mortality not included in Phase 1b

Persons not identified in Phase 1a or Phase 1b, and includes persons 65-74 years of age, Persons 16-64 years of age with high risk medical conditions, and additional essential workers not identified in previous phases. *CURRENTLY WE ARE IN PHASE 1C*

ALABAMA COVID-19 VACCINE PHASE 2

PHASE 2

All persons in age groups not previously recommended for vaccine (ages 16-64) and general population not included in earlier phases

ADPH has no specific timetable about when members of the general public can be vaccinated. Once the vaccine becomes readily available, the public may visit vaccinefinder.org to locate a COVID-19 vaccine provider.

Have questions about COVID-19 safety and getting vaccinated?

COVID-19 Information Hotline

1-800-270-7268

WHY SHOULD YOU GET VACCINATED?

- It's safe, simple, and free of charge.
- It could keep you from getting COVID-19. If you still get COVID-19, it could keep you from becoming seriously ill.
- It will help you do your part to slow the spread of COVID-19 and protect the health of your family, your friends and your community.
- It's an mRNA vaccine. These types of vaccines have been studied for more than two decades to evaluate their safety and effectiveness.
- It's the first step to returning to normal.

Continue to Practice Public Health Guidelines Before and After Vaccination

As the supply of vaccine remains limited, ADPH continues to urge the public to practice the measures needed to help reduce the transmission of COVID-19.

Alabama residents should continue to exercise caution by minimizing travel and avoiding gatherings of people beyond their immediate household.

After vaccination, continue to:

- Wash your hands
- Wear a mask
- Practice social distancing
